Hi Charles,

I've picked up a couple of CDRs by this band recently and I must say they are fantastic, and probably deserve a record deal. It's kind of psychedelic, progressive folk music, quite dream-like, and actually I was reminded of Use of Ashes, though it has a more english 'pagan' feel, making it perhaps closer to 70's band Comus. The music is very beautiful and accomplished. Would you like me to upload one of their albums for you to listen to? It would be perfect for vinyl I feel. Right now their CDRs are limited to about 50 copies and they deserve more than that.
